Ibrahim Askani's Message

(Founder, NextGen International School)

Dear Parents and Guardians,

It fills me with immense pride and deep humility to welcome you to NextGen International School — a school born not from routine, but from a revolution. A revolution in how we think about education, how we value children, and how seriously we take our responsibility to Pakistan's future.

We looked around at the world our children are inheriting — a world of artificial intelligence, rapid change, global connectivity, and deep moral challenges — and we asked ourselves: Is our current model of schooling enough? The honest answer was no.

That honest answer led to the creation of NGIS: the first ETM-powered school in Karachi, built on South Korean educational standards, grounded in Islamic values, and equipped with the tools, methods, and people that will genuinely prepare your child for the world ahead.

But beyond curriculum and technology, what I want you to know — what I want you to feel — is that your child is safe here. Deeply, unconditionally safe. From the moment they enter our gate to the moment they return to your arms, every protocol, every instructor and coach, every corner of this campus is designed with one priority above all else: our learner's wellbeing.

We are not just educating your kids. We are shaping them as confident individuals compassionate and fearless human beings who should love their faith, respect their community, and possess the skills they need in order to change the world with their spectacular innovations, -INSHALLAH-

Welcome to NGIS. Welcome to the Movement.

With warm regards,

Ibrahim Askani

Founder, Nextgen International School

Saif-ur-Rehman's Message

Dear Parents and Guardians,

NextGen International School was not built to be one more name on Pakistan's school list. It was built to answer the question every thoughtful parent is asking today: in a world reshaped by technology, faith, and global competition, is traditional schooling still enough? Our answer is no — and NGIS is our response. As a Project of Robotmea, powered by ETM on South Korean Educational Standards and accredited by Robotron, South Korea, we have brought a globally benchmarked system to Karachi, anchored in Islamic values and delivered through a 21st-century STEAM framework that prepares your child not just for the next exam, but for the next era.

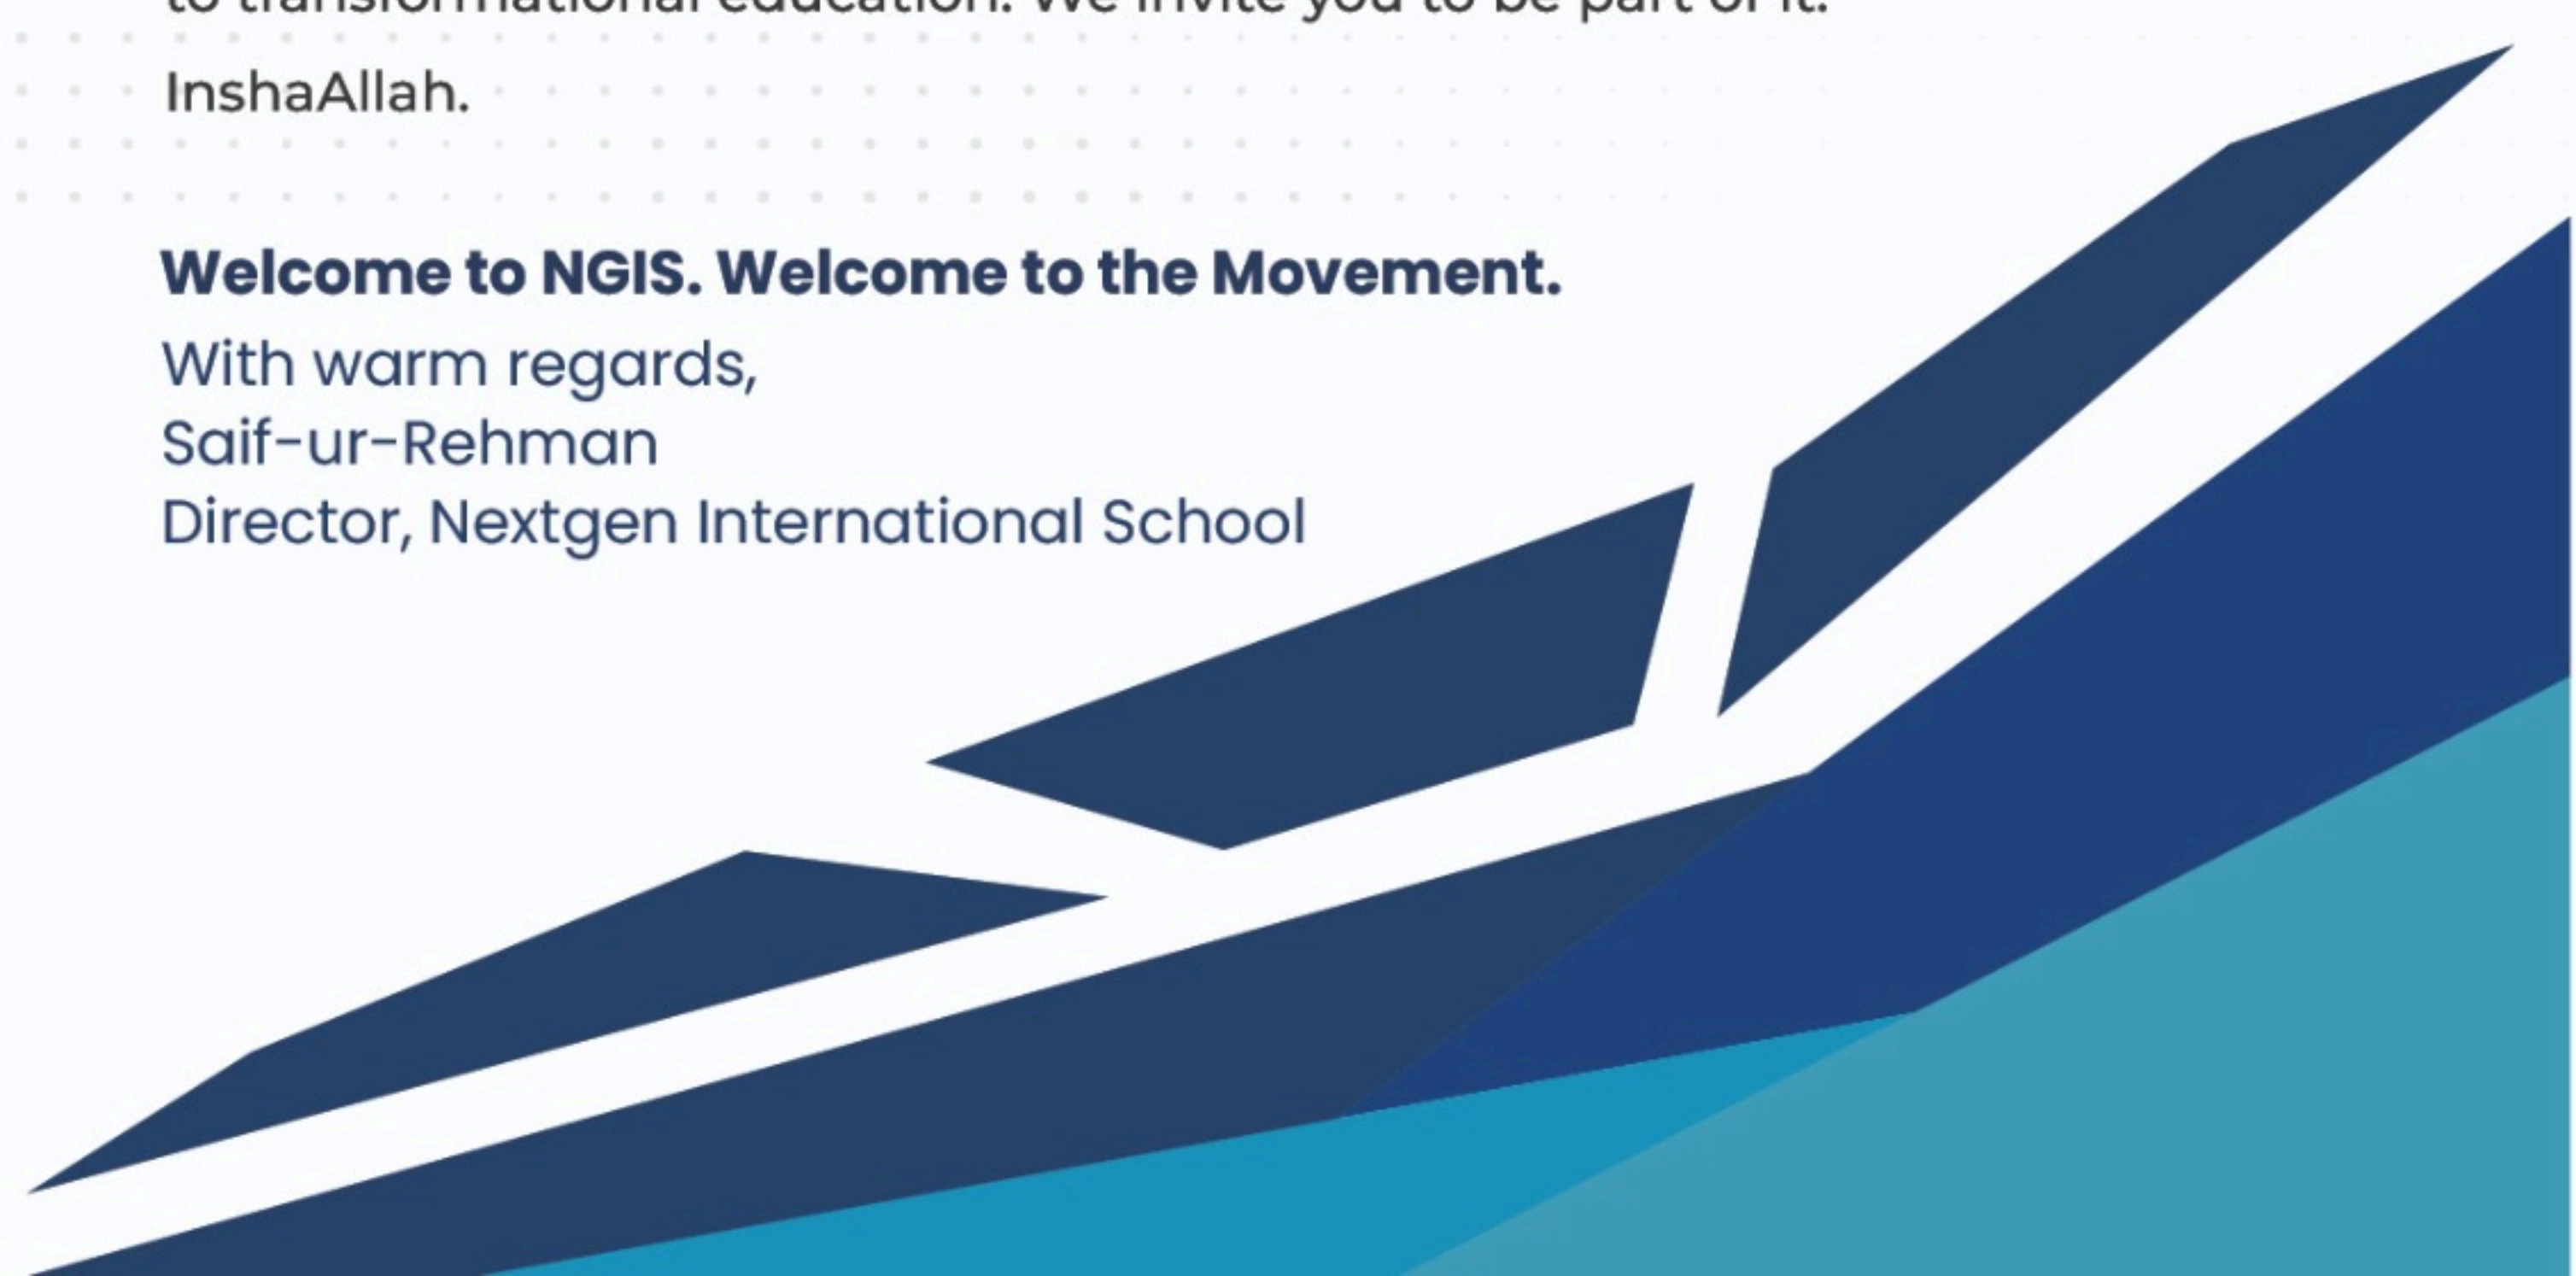

To the parents — your child's safety, character, faith, and intellect are not items on a checklist here; they are the whole purpose. To our students — be bold, be curious, and be proud of who you are, because the future belongs to those who build it.

This is Pakistan's First ETM-Powered School — the movement from transactional to transformational education. We invite you to be part of it.

InshaAllah.

Welcome to NGIS. Welcome to the Movement.

With warm regards,
Saif-ur-Rehman
Director, Nextgen International School
